# GNAHRGIS: APPLICATION UPDATE: GDOT HISTORIC COUNTY MAP

---

## Summary

The GNAHRGIS enhancement to afford search and display of GDOT Historic County Maps are now available on the GNAHRGIS “public map” platform as of September 2015. The utility of this feature are implemented via the layers widget. The following document describes the typical use and results of this new capability.

## Table of Contents

How to use the GDOT Historic County Maps widget in GNAHRGIS: ..... 1

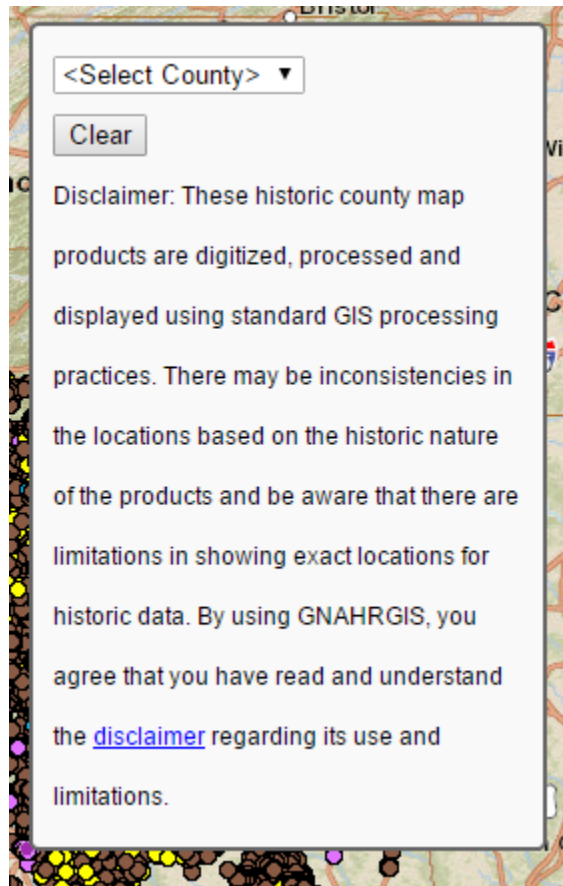

## How to use the GDOT Historic County Maps widget in GNAHRGIS:

- The GDOT Historic County Maps widget is available in GNAHRGIS public at the following location: <https://www.gnahrgis.org/>
- The widget is available through a “layers” menu on the public map main menu:

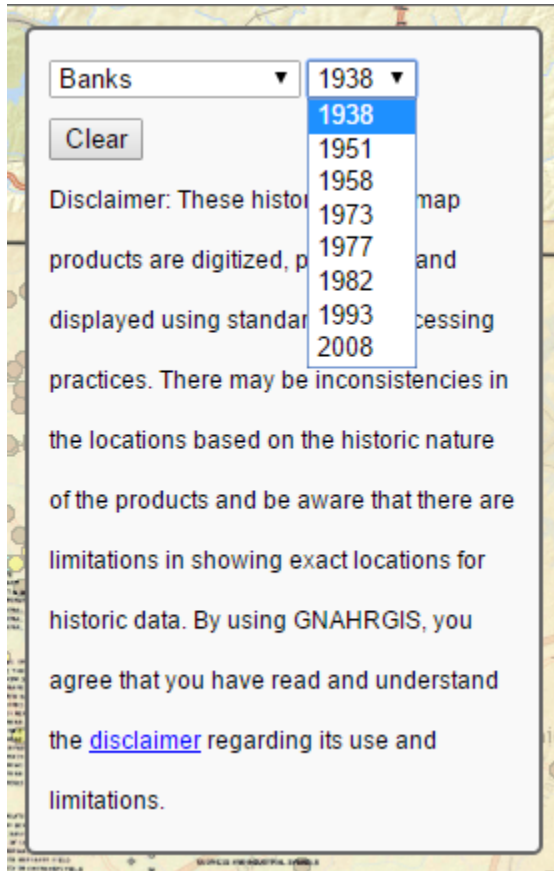

Figure 1: Public map main menu with layers menu icon activated and the Historic GDOT County Maps layer circled:

- Click on the checkbox next to the Historic GDOT County Maps layer label

Choose options from the “Select County”. This will activate the year drop down list that have county maps available for the chosen County.

- Choosing the year will update the map
- Choosing “Clear” will reset the map display.
